

May 2020

To our fellow business leaders:

Since its founding in 2007, Don Bosco Cristo Rey High School has strengthened our community by preparing hundreds of economically challenged young people for college and for the professional work force. Through its unique Corporate Work Study Program, Don Bosco Cristo Rey provides students with invaluable work experience, building their confidence, developing their life skills, and ensuring their long-term success in the professional world. The Corporate Work Study Program generates *nearly half of the operating revenue of the school*. We write to you now because during this period of economic uncertainty created by the COVID-19 pandemic, Don Bosco Cristo Rey needs the support of the business community more than ever.

We partner with Don Bosco Cristo Rey by investing in the Corporate Work Study Program because, like you, we believe in the transformative power of the program. We understand that the students and families of the school are particularly vulnerable in this crisis and we intend to remain steadfast in our support of them. We ask you to join us and other business leaders by continuing to prioritize an investment in Don Bosco Cristo Rey's Corporate Work Study Program in the year to come.

In gratitude,
